Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-34** drawn to Gas –turbo machinery, compressor , classified in class 60, subclass 39++.
 - II. **Claims 35-44**, drawn to rotor of a generator , classified in class 310, subclass 61.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as " Gas turbo machine /compressor "can be used for any mechanical rotating machine. Such as water pump .the invention II " rotor for a generator "can be used in any electrical machinery such as generator, or motor ,See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Applicant representative Mr. Daniel Bliss on January 27, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2834

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
